

Software Engineer (Working Student)

QuantPi is a spin-off of the prestigious Helmholtz Center for Information Security (CISPA), located in Saarbrücken, Germany. As a research-driven venture, we develop automated solutions for explainability and robustness auditing of AI models. We are looking for a Software Engineer to join our competitive R&D team.

Preferred Qualifications:

- 1+ years of working experience with product development practices, including software testing
 - Have a firm grasp over HTML, CSS and modern JavaScript/TypeScript frameworks
 - Knowledge of relational databases and SQL
 - Familiar with agile development practices
 - Proficiency in written and spoken English, German is a plus
 - Professional experience with Python (Django/Flask) or Node.js is a big plus
-

What we offer:

At QuantPi, we actively work to create an environment that values end-to-end ownership, diverse forms of impact, and opportunities for personal growth. Our international expert team is looking for individuals with the right personality and background to help in shaping a fast-growing organization. QuantPi prohibits discrimination and harassment of any type on the basis of race, color, religion, age, sex, national origin, sexual orientation as well as gender identity or expression. All employment is decided on the basis of qualifications, performance, merit, and business need.

If you are driven, committed and up for exciting challenges, we'd be more than happy to meet you. If this open position does not fully match your qualifications, we're always accepting unsolicited applications. Please send your CV, certificates, links to open-source projects and any other information you consider relevant to contact@quantpi.com.
